## Paint Express: HYDRO structuring pastes

---

Adding of different Structure pastes to both our HYDRO Colour lacquer systems **COOL-COLOR** HB 6528x(gloss level)-(colour tone) and **PERFECT-COLOR** HDB 5434x(gloss level)-(colour tone) achieves differing pearl structure effects.

The result is a pleasant feel and visually interesting effects. This lacquer system's already exceptional surface properties are further improved by the Structure additive with little extra effort.

This creates particularly scratch- and scrub resistant surfaces.

### Materials required:

**HZ 710** for a **fine**

**HZ 720** for a **medium** and

**HZ 750** for a **coarse** pearl structure

Base colour lacquer:

**COOL-COLOR** HB 6528x(gloss level)-(colour tone) or  
**PERFECT-COLOR** HDB 5434x(gloss level)-(colour tone)

### Mixture details:

- 95.0 parts of the desired HYDRO Colour lacquer
- 5.0 parts of the corresponding Pearl Structure paste

This way modified colour lacquer should be additionally marked with "pearl effect".

### Use:

- Stir all materials carefully before use.
- Stirring by hand ensures good incorporation of the Structure paste into the colour lacquer.
- If you use an agitator, please ensure that the material does not become foamy due to over-stirring.
- In the case of **PERFECT-COLOR**, the Structure paste must be mixed in **prior to hardening**.
- Finished Pearl structure lacquers can be diluted as necessary.
