

Paint Express: Structure additive fine EL 460-0030

Adding Structure additive EL 460-0030 to UNA-COLOR DB 4524x(gloss level)-(colour tone), UNA-THIX-COLOR DB 4520x(gloss level)-(colour tone) and FANTASTIC-COLOR DB 4888x(gloss level)-(colour tone) results in a finer pearl texture effect.

The outcome is a pleasantly non-slip and visually interesting effect with yet further improvement in this lacquer system's already exceptional surface properties, at little extra effort thanks to the structural additive. This creates particularly scratch and scuff resistant surfaces.
