## Agenda

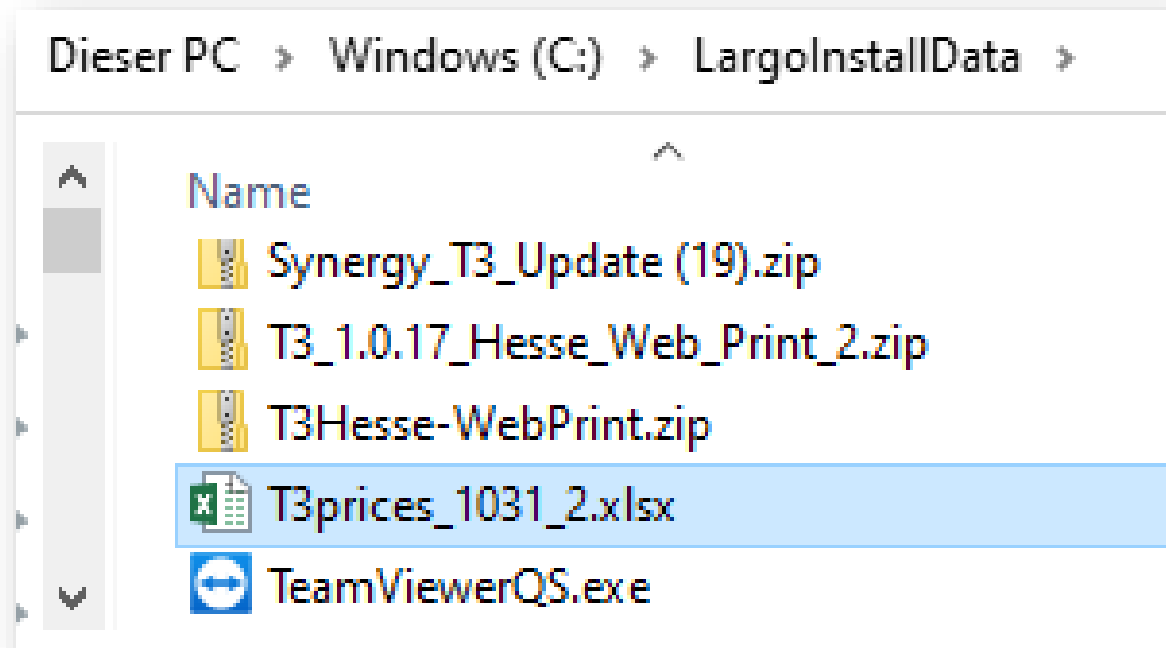

- Showing the options
- Where are the prices entered?
- Input prices mixing components
- Different input for prices of base coats and small containers
  - Way 1
  - Alternative way
- General surcharges / calculation of sales prices
- Important notes
- Price adjustments
- New products

- Display of the **pure purchase price**
- Display of the **sales price without/with VAT**
- Use of minimum prices
- Small containers with higher prices
- Handling surcharge per container

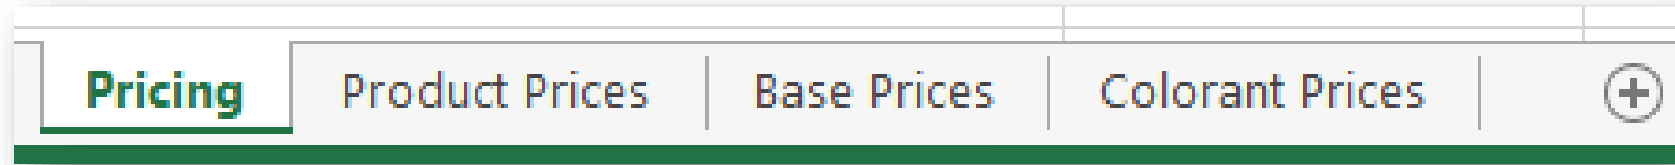

## Input calculation data

- The data is entered via an **Excel list**.
- Location on the PC or server.
- Setup during installation
- The list can be changed at any time

These spreadsheets can be edited:

(ideally with Excel)

You work without **pre-filled containers**?

e.g. for stains, oils, lacquer-in-lacquer mixed lacquers, CREATIVE METALLIC, ...

→ Choose **path 1**

Do you work with an automatic mixing machine?

Fill the basecoats yourself on the scale, select **path 1**.

If you purchase the basecoats prefilled, there are 2 ways to calculate the additional costs of small containers by entering a separate price for each prefilled container. In the following we show the pricing with **path 1 as well as an alternative**.

Under certain circumstances, a combination of the ways is also useful if you work with both the scale and pre-filled containers. The data can then be entered in different ways for **each product**.

## Path 1

In the spreadsheet [Base Prices](#) , enter your prices for the base coats that you dose with the scale, regardless of whether you only work with the scale or fill containers for the automatic mixing machine yourself.

ID	Name	Base	Preis
10	DB 45245-FT [Hesse UNA-COLOR, seidenmatt]/LiL	None	0,00 €
11	DB 45245-FT [Hesse UNA-COLOR, seidenmatt]/Paste	DBM 42994-0901	20,00 €

## Path 1

For all products, you can still have surcharges added for small containers to get paid for the higher expense.

ID	Name	Base	Gebinde	Preis	B
790	BE XX-FT [Hesse Edelholzbeize]/Beize	None	1	10,00 €	
790	BE XX-FT [Hesse Edelholzbeize]/Beize	None	3	20,00 €	
790	BE XX-FT [Hesse Edelholzbeize]/Beize	None	5	30,00 €	
790	BE XX-FT [Hesse Edelholzbeize]/Beize	None	15	0,00 €	
790	BE XX-FT [Hesse Edelholzbeize]/Beize	None	25	0,00 €	
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	1	10,00 €	
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	3	20,00 €	
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	5	30,00 €	
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	15	0,00 €	
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	25	0,00 €	

- Editing in the list [Product Prices](#)
- The surcharge is calculated per container, not per liter.
- The easiest way to process is to select the same additive price for all coatings/stains.
- The Excel filter function can also be used for this purpose in the Container column.

## Prices of base coats and small containers

If you buy **ready prefilled containers** at your automatic paste blending system, you will purchase the small, prefilled containers more expensively than the large containers. If you want to calculate the price exactly and not with a flat surcharge, then add the additional costs on top. (Small container surcharge)

You can also slam this difference in the list. [Product Prices](#)

Add the extra cost of the small bundle to the price of the base that you entered in the List [Base Prices](#) at the base material.

The price refers to a **surcharge per container**.

Example: Base material HBM 65285-0901 in 20 l container 20 €/l, in 2.4 l container 25 €/l

Entry in list [Base Prices](#) and [Colorant Prices](#) with 20 €/l

The 3-liter container is prefilled with 2.4l. With a liter price of 25€/l, this corresponds to  $2.4l \times 25€/l = 60€/\text{container}$ .

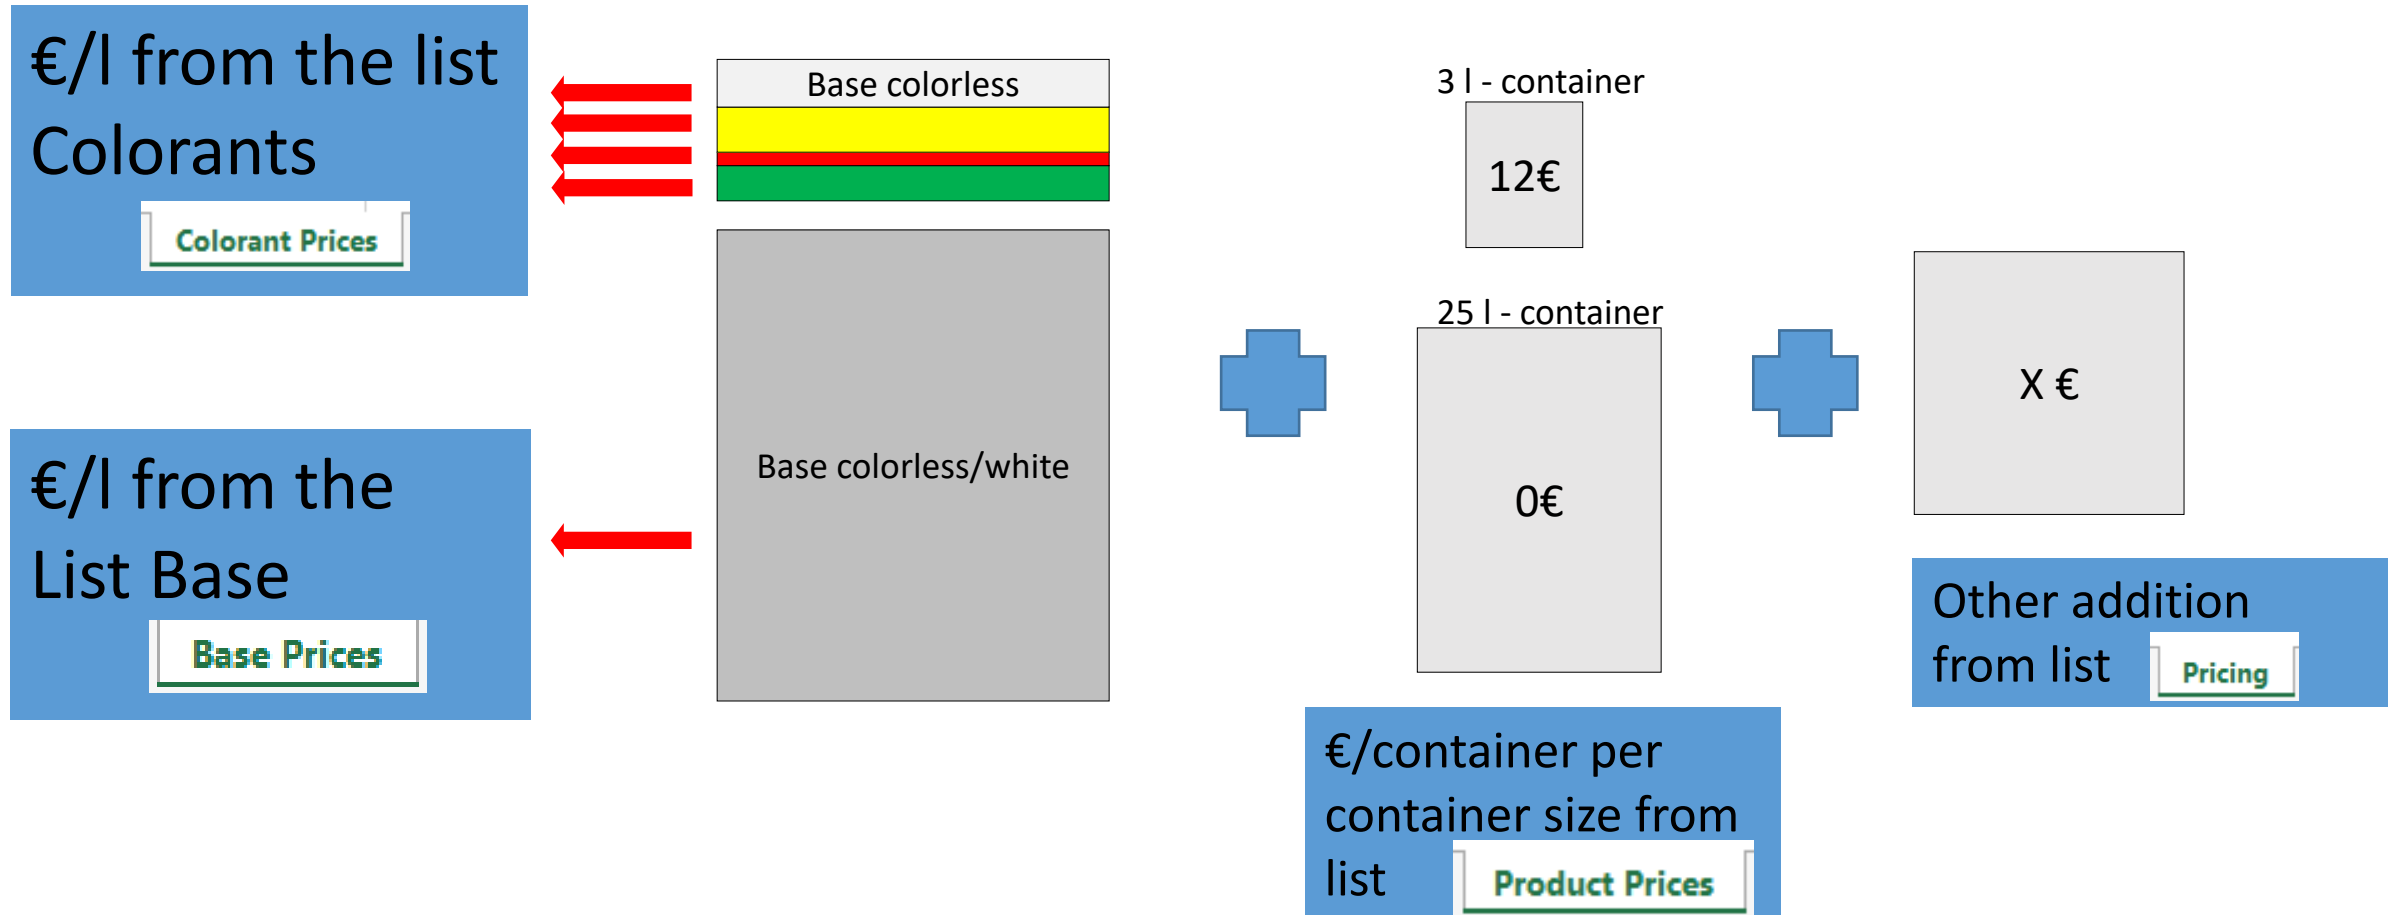

However, the program calculates with the base material price of 20 €/l, resulting in  $2.4l \times 20€/l = 48 €$  per 2.4 l container. You can enter the difference of 12 € on the container in the list [Product Prices](#) as a surcharge.

Other surcharges such as handling costs can still be added.

2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	1	0,00 €
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	3	12,00 €
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	5	0,00 €
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	15	0,00 €
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	25	0,00 €

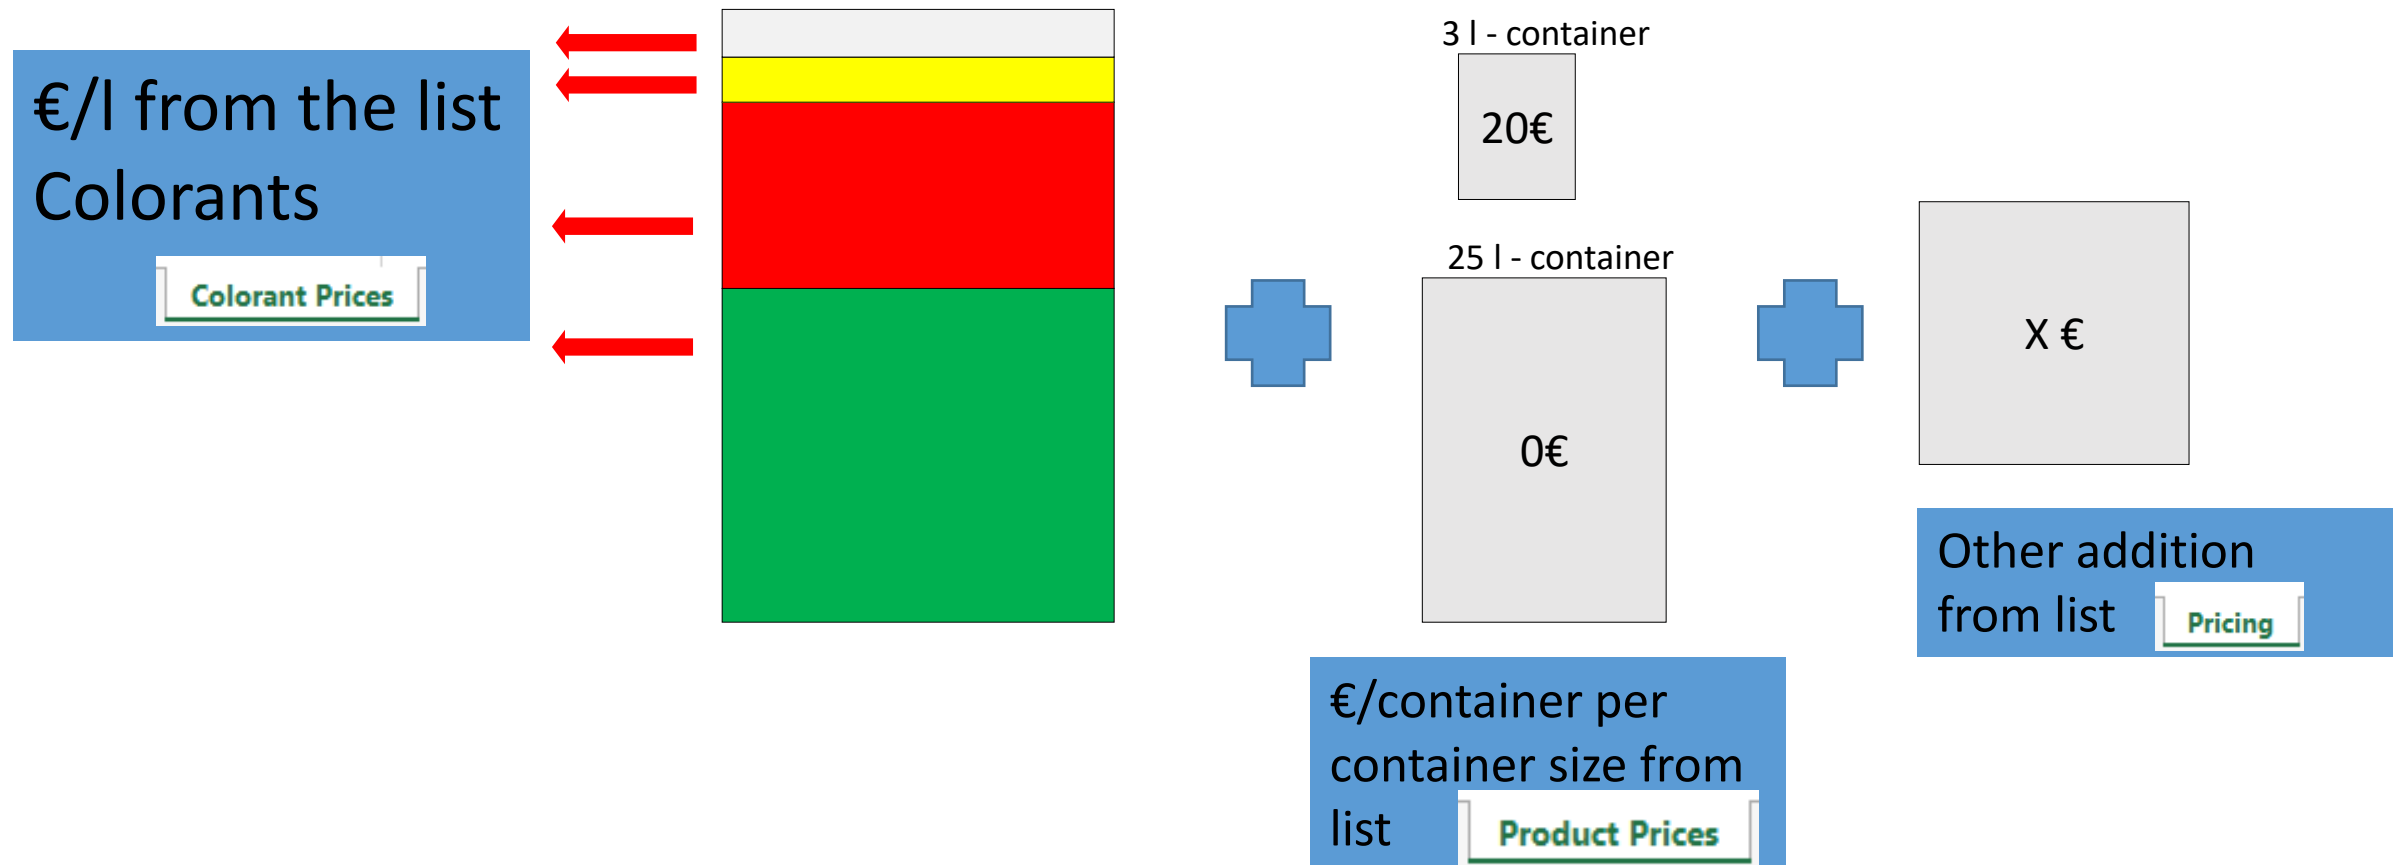

# This is how the price is created

## Varnish with base

# This is how the price is created

Öl / Beize / Lack-in-Lack / CREATIVE METALLIC ohne Basis

## Alternative way for ready pre-filled containers

Another way of calculation for paints with base is as follows: you **do not** enter the base prices in the list [Base Prices](#)

Instead, enter the complete container price of the prefilled base material in the list. [Product Prices](#)

Example: Base material HBM 65295-0901 (prefilled): in 20 l container 20 €/l, in 2.4 l container 25 €/l according to price list

No entry in list [Base Prices](#) Instead, the price of a complete pre-filled container is entered:

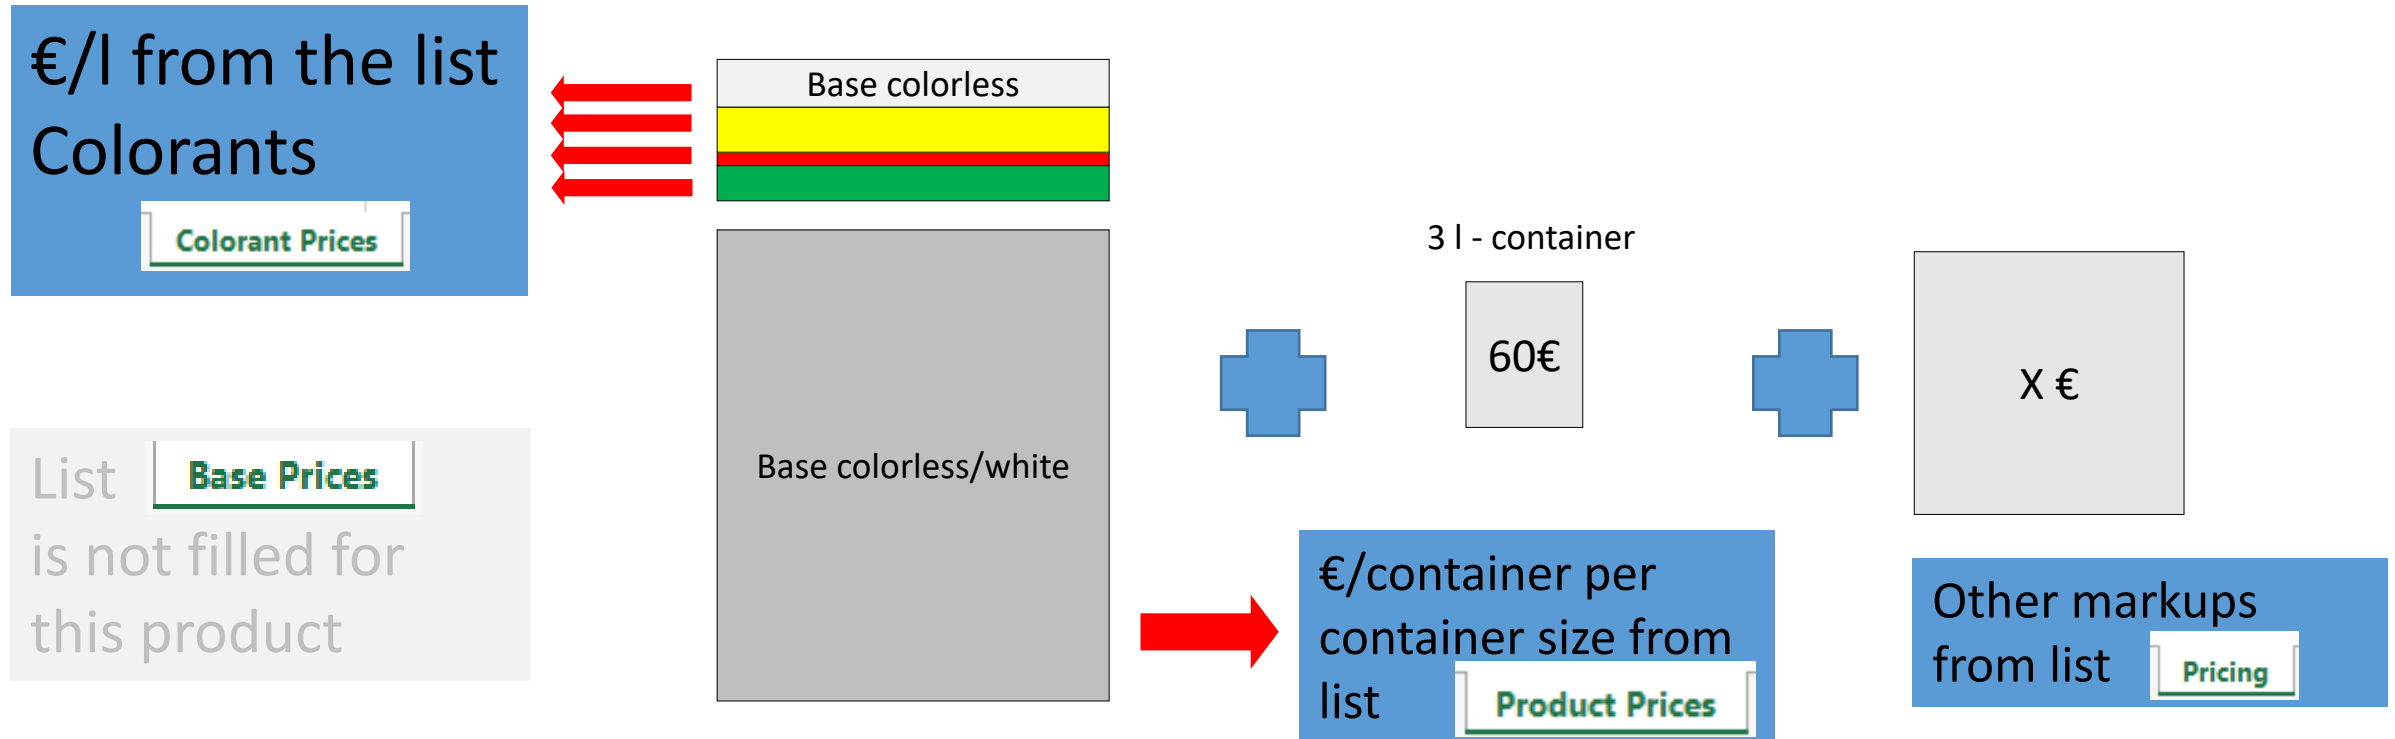

The 3-liter container is prefilled with 2.4l. With a price per liter of 25€/l, this corresponds to  $2.4\text{l} \times 25\text{€/l} = 60\text{€/container}$ , which you enter on the container in the list [Product Prices](#) as a surcharge.

Other surcharges such as handling costs can still be added.

ID	Name	Base	Gebinde	Preis
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	1	0,00 €
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	3	60,00 €
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	5	0,00 €
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	15	0,00 €
2301	HB 65282-FT [Hesse COOL-COLOR, matt]/Paste	HBM 65285-0901	25	0,00 €

# This is how the price is created

## Varnish with base: **alternative way for ready prefilled containers**

## Sales prices

---

The entered prices of the spreadsheets [Base Prices](#) and [Colorant Prices](#) , depending on the design, also of the [Product Prices](#) are used to calculate the **purchase price**.

If you would rather have a **sales price** displayed, you can control this using various surcharges. The table [Pricing](#) is mainly used for this purpose.

Depending on the design of the calculation, additional costs for small containers can also be added to the prices in the list. [Product Prices](#)

## Other surcharges

Sheet Pricing :

**VAT:** If this is to be displayed, the tax rate must be entered and the *incl. VAT* field must contain the value „WAHR“

No calculation: set VAT to 0%.

Key	Value
VAT	0,00%
Colorant margin	45,00%
Base margin	45,00%
Product margin	45,00%
Surcharge per can	0,00 €
Incl. VAT	WAHR
Minimum price	0,00 €
Incl. VAT	WAHR

**Margins:** Margins can be entered to determine the **sales price**. (for colorant, bases, products)

**Surcharge per container:** This can be used to calculate general costs such as packaging, labeling, handling per container.

**Minimum price:** This is the lower price limit for a container.

## Important notes

Once you have entered your data, **check the results to see if they match what you want.**

In the tables, Product Prices | Base Prices the **prices** are **product-related**. Different prices can be entered here for each product in order to set price priorities.

If **new coating systems or base materials** are added, prices must be supplemented.

Surcharges for small containers are calculated only for the defined sizes 1, 3, 5, 15, 25 liters. These are NOT taken into account for **intermediate sizes**. Product Prices

The final prices shown are **prices per container**.

The **net price** is shown in brackets, when the value added tax is used.

DB 45245-FT [Hesse UNA-COLOR,

5 l ▾ Base: DBM 42994-0901 Preis: 194,48 € (163,43 €)

## Implementation of price adjustments

If prices of different products are changed, you can enter them manually into the lists:

Product Prices	Base Prices	Colorant Prices
----------------	-------------	-----------------

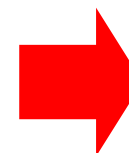

Alternatively, if prices are changed as a percentage across all products, you can use Excel to calculate them.

Example: Increase rate 10%

Enter formula, insert calculated value in column E as number again and delete formula again

Check if all values  
were adjusted and the  
Calculation fits.

## Adding a new product to the calculation

- Open a new recipe (Ctrl + N)
- Search for the product you want to add
- Remember the product ID  
(example: 3630)
- Remember name  
(example: WRB XX-FT [Hesse HYDRO Rustikalbeize])

The screenshot shows the 'Largo Synergy T3 Standard 1.0.29' application window. The 'Rezeptur' menu is open, highlighting 'Neue Rezeptur' (Ctrl+N). Below the menu, the 'Rezepturinformationen' form is visible, with the 'Nummer' field set to '0002'. At the bottom, the 'Rezeptur' section shows the 'Produkt' field with the value '3630' and the name 'WRB XX-FT [Hesse HYDRO Rustikalbeize]/Beize 3630'.
